- Please read this form or have someone read it to you
- It's important to understand all parts of this form. If something isn't clear, ask us to explain
- When you sign it, that means you understand the form and give us permission to do this surgery or procedure

I agree for Dr. Yousif along with any assistants\* they may choose, to treat the following condition(s): \_\_\_\_\_

By doing this surgery or procedure on me: \_\_\_\_\_

\*If you'd like a list of the assistants, please ask. We can give that to you.

1. The care provider has explained my condition to me. They have told me how the procedure can help me. They have told me about other ways of treating my condition. I understand the care provider cannot guarantee the result of the procedure. If I don't have this procedure, my other choices are:  
No surgery
2. The care provider has told me the risks (problems that can happen) of the procedure. I understand there may be unwanted results. The risks that are related to this procedure include: Bleeding, infection, nerve, vessel injury, stiffness, persistent pain, need for future surgery, death, risks of anesthesia
3. I understand that during the procedure, my care provider may find a condition that we didn't know about before the treatment started. Therefore, I agree that my care provider can perform any other treatment which they think is necessary and available.
4. I understand the care provider may remove tissue, body parts, or materials during this procedure. These materials may be used to help with my diagnosis and treatment. They might also be used for teaching purposes or for research studies that I have separately agreed to participate in. Otherwise they will be disposed of as required by law.
5. My care provider might want a representative from a medical device company to be there during my procedure. I understand that person works for: \_\_\_\_\_

The ways they might help my care provider during my procedure include:

- Helping the operating room staff prepare the special device my care provider wants to use
  - Providing information and support to operating room staff regarding the device.
  - Doing other things, including providing hands-on help (describe): equipment maintenance
6. Here are my decisions about receiving blood, blood products, or tissues. I understand my decisions cover the time before, during, and after my procedure, my treatment, and my time in the hospital. After my procedure, if my condition changes a lot, my care provider will talk with me again about receiving blood or blood products. At that time, my care provider might need me to review and sign another consent form, about getting or refusing blood.

I understand that the blood is from the community blood supply. Volunteers donated the blood. The volunteers were screened for health problems. The blood was examined with very sensitive and accurate tests to look for hepatitis, HIV/AIDS, and other diseases. Before I receive blood, it is tested again to make sure it is the correct type.

My chances of getting a sickness from blood products are small. But no transfusion is 100% safe. I understand that my care provider feels the good I will receive from the blood is greater than the chances of something going wrong. My care provider has answered my questions about blood products.
